

RTS

Residue Tillage Specialist (RTS) replaces several tools with one.

RTS

- Salford's Residue Tillage Specialist (RTS) cuts and distributes crop residue while warming the soil to a shallow depth and releasing excess moisture to create an ideal seedbed.
- Patented coil-tech coulters are designed for high speed and low maintenance, making it the most durable coulters system available.
- Add your choice of attachments for deep fertilizer, more aggressive fall tillage or seeding cereal, grains, grass, hay, canola and cover crops.

The jack hammer vibration of the coil-tech coulters weakens the soil far below the operating depth of the coulters which improves soil aeration and drainage. As a result, root growth and development is improved.

Key Features

- Operates in high moisture conditions
- 17" or 20" x 4.5 mm blades
- Hydraulic self-leveling frame
- Hydraulic single point depth control
- Tine harrow Quick Pitch Adjust mechanism with no tools required
- Coil-tech coulters rock protection
- Predrilled for universal mounting
- Walking tandems for road transport start at 18" and up
- Attachment options for seeding, fertilizer deep placement, chisel tillage and NH₃ injection
- Attachment options for seeding, fertilizer deep placement, chisel tillage and NH₃ injection
- Rear tow hitch options for air carts, liquid fertilizer wagons or anhydrous tanks
- Axle upgrades available to carry mounted liquid tanks or small ValMar grass seed or cover crop delivery systems
- Independently mounted coil-tech coulters on five tool bars will not plug in heavy wet residue
